Panthaweekan Somngam

Software Engineer | Bangkok, Thailand (GMT+7) | Open to Remote / Hybrid | +66 946359510
panthaweekansomngam@gmail.com | panthaweekan.github.io/Portfolio | github.com/Panthaweekan | linkedin.com/in/panthaweekan

Full-stack software engineer at SCB TechX building AI-platform and banking infrastructure. Currently building the system that shows customers what their AI (LLM) usage costs; before that, a new API gateway service for SCB Easy (10M+ users).

PROFESSIONAL EXPERIENCE

Associate Software Engineer
May 2025 – Present

SCB TechX · Bangkok, Thailand (Hybrid)

Agentic AI Platform — FinOps Engine | Go, Kafka, OpenTelemetry, PostgreSQL, AWS, Next.js, TypeScript — Sep 2026 – Present

- Ran discovery for the FinOps (AI cost management) module of SCB TechX's agentic AI platform: wrote the requirements, module spec, and service design for the product owner and engineering manager, and won agreement that budget enforcement should stay inside the platform.
- Built, with two teammates, the engine that works out what each customer's AI usage costs, down to team and project level: a Go service consuming OpenTelemetry usage events from Kafka, with exact-money pricing at the price and FX rate in force, retry and dead-letter handling so no charge is lost or double-counted, and multi-tenant PostgreSQL with AWS IAM auth.
- Built the AI cost dashboard in the platform's Next.js console, drilling from organisation down to team, project, workflow, run, and step (in review), over a typed reporting interface to the engine.
- Set the team's engineering practices (architecture decision records, test-first development with a coverage gate, lint-enforced hexagonal layering) and built an AI-assisted code review workflow, adopted team-wide, whose reviewer agents and verifier catch bugs human reviewers missed.

API Gateway Migration | Go, Fiber, Kong, Redis, PostgreSQL, Prometheus, Kubernetes — 2025 – Sep 2026

- Built a new Go service behind Kong for token validation, authentication, and request routing, part of moving SCB Easy (10M+ users) off its legacy on-premise API gateway; handed over to the team in Sep 2026 as the migration continued.
- Designed the gateway's plugin system, routing engine, and Prometheus monitoring, and prototyped safer rollout across the migration's 30+ services: YAML config sync with diff and rollback (Kong decK pattern) and per-service circuit breaking.

Enterprise Asset Management Platform | Ruby on Rails, React, TypeScript, PostgreSQL, Azure AD, Docker — 2025

- Replaced spreadsheet- and email-based asset tracking with an internal platform running four request lifecycles through per-role approval chains, with Azure AD single sign-on, six user roles, and reporting with Excel/CSV export.

Full Stack Developer (Work-Study Scholarship)
2023 – 2025

Chiang Mai University, Faculty of Engineering · Chiang Mai, Thailand

- Built and launched two production web applications used across the faculty, owning everything from stakeholder requirements to containerized deployment (Go, React/TypeScript, PostgreSQL), including a multi-stage workflow that digitized paper-based certificate approvals and cut turnaround from weeks to days.
- Built SD-Booking, the room reservation system the faculty uses for daily scheduling, still in active use today: real-time booking with conflict detection, role-based access, an admin dashboard, and mobile push notifications.

EDUCATION

Bachelor of Engineering in Computer Engineering
Graduated 2025

Chiang Mai University · Second-Class Honours · GPA 3.32/4.00

SKILLS

Languages: Go, TypeScript, JavaScript, Ruby, Python, SQL, HTML/CSS

Frameworks: Fiber, Gin, Echo, Ruby on Rails, React, Next.js, Node.js, Tailwind CSS, TanStack Query

Infrastructure: PostgreSQL, Redis, Kafka, Docker, Kubernetes, AWS (EKS, RDS, Secrets Manager), Kong API Gateway, Supabase, Vercel, Linux

Observability & Tools: OpenTelemetry, Prometheus, Grafana, ELK Stack, Git, GitHub Actions, HashiCorp Vault

Practices: System Design, Data Structures & Algorithms, REST APIs, Microservices, CI/CD, TDD, Agile/Scrum

Spoken: Thai (Native), English (Intermediate)
